

# AL3 Parser (AL3 Reader / Translator)

# What is AL3?

---

WinsurTech AL3 Parser is an AL3 reader & translator program, that converts the ACORD AL3 format file to JSON, XML, CSV, Excel, and PDF formats. WinsurTech AL3 Parser uses the latest ACORD AL3 Standard groups and elements information. WinsurTech is an ACORD Member (Solutions Provider) and we build products implementing ACORD standards.

## Formats supported and Other Features

WinsurTech AL3 Parser is a standalone library (supported for both Windows and Ubuntu) that can be invoked from the command line or through a program written in any programming language like PHP, C#, Python, NodeJS, Ruby or any other. It can convert the AL3 file to JSON, XML, Excel, PDF, or CSV formats (simple or detailed as you need) and its output can be easily consumed by any software. AL3 Parser produces well-organized JSON and Excel segregated into Basic Policy Information and Schedules to make it easy for your team to understand the JSON and extract data from it.

### AL3 Parser Licensing

WinsurTech AL3 Parser does not make you pay for each transaction. You already know how expensive some companies make that model, and WinsurTech does not make you pay huge amount of money. There are affordable, one time payment licenses in 2 classes (per installation):

1. Annual License (Unlimited Conversions, Bulk Conversions included)
2. Lifetime License (Unlimited Conversions, Bulk Conversions included)
